University of Redlands
Redlands, California
(2006- 2010)

BA - International Relations

PROJECTS

Yelper 2017

[Live Site](#) | [Github](#)

A full-stack, single-page business reviews app inspired by Yelp, built from scratch with a Ruby on Rails backend and a front-end powered by React.js

- Integrates Google Maps API for seamless geolocation browsing and searching
- Allows simple creation of new businesses or reviews that are persisted in the backend database
- Features reusable React components that can be styled differently while retaining the same properties and functionality

Mothership Down

[Live Site](#) | [Github](#)

Space Invaders inspired arcade game built in vanilla JavaScript and HTML Canvas

- Animates parallax scrolling background using native JS frame animation intervals
- All images and UI rendered/updated with vanilla JS. No external libraries or tools used besides webpack for compiling script files

Fifty/Fifty

[Live Site](#) | [Github](#)

A modular quiz game that pulls its answers from public API information.

- Utilizes Node.js and Express to consume public APIs and serve the data into the asynchronously into the frontend game container
- Implements a React.js frontend to store/manipulate game state and display game components

EXPERIENCE

Vernier Watches, New York, NY

Technology Consultant

| 2018
